UNDERNEATH THE DOCK SHOWS THE FLOTATION DESIGN WITH DISPLACEMENT AIR CHAMBERS THAT CREATE A SUCTION EFFECT THAT ENHANCES STABILITY ON THE WATER.

It takes a crew working together as one to win. Each member moves in sync, driven by the same goal, as they speed to the finish line.

It may look effortless, but it's a feat that requires perfect balance and unwavering focus. At EZ Dock, we know nothing should stand in the way of finding that focus. It's why we created a low profile dock that's incredibly stable and durable, allowing your crew to get in the water quickly – and connect with what matters most.

BUILT FOR INDIVIDUALS AND
TEAMS, THE **LOW PRO DOCK**
GETS YOU IN AND OUT OF THE
WATER EFFORTLESSLY.

MAXIMIZING TRAINING, MINIMIZING DOUBT

Low Profile Rowing Dock Helps College Programs Get More Out Of Practice

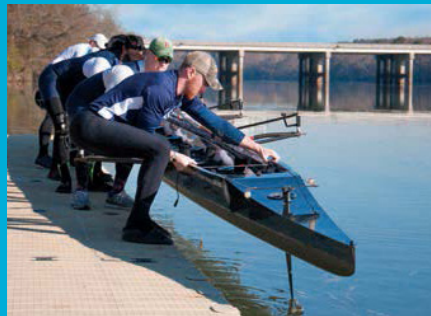

Bob Gillette
Head Coach, URI Crew Team

Devastated by the loss of their dock following a flood in 2016, the Columbia Rowing Club in South Carolina knew installing a new high performance rowing dock was critical. College teams that travel miles from the northeast rely on Columbia for critical spring training that can make or break a season.

They chose the Low Profile Rowing Dock from EZ Dock, and teams immediately took notice. Bob Gillette, Head Coach of the University of Rhode Island Crew Team, left extremely impressed. "The dock is one of the last things you want to think about. Like a referee in sports, if it's good, you don't notice it at all. Too often that's not the case."

"This is one of the lowest and most stable docks I've seen. My team has been to regattas where you need boots on the dock because it submerges or resembles a child's bounce house. But with the one at Columbia, you could have 16 people on the edge and it'd work perfectly. I'd recommend it to any rowing program."

With the Low Profile Rowing Dock from EZ Dock, his team was able to concentrate on their rowing session and not the walk to get there, getting the most out of their spring training and leaving better prepared for the season.

" I WAS IMPRESSED WITH THE INSTALL. GIVEN THIS DOCK IS ALMOST 120' LONG WE ANTICIPATED IT WOULD BE A TWO DAY AFFAIR PUTTING IT IN- THEY HAD IT DONE IN 1 MORNING. IT WAS A WORK OF ART WATCHING HOW THEY BROKE DOWN THE PILE OF MATERIALS, SET IT OUT, SET IT ON THE EMBANKMENT TO BE ABLE TO PUT THOSE PIECES OUT INTO THE RIVER, IT WAS VERY IMPRESSIVE."

**- John Worrett,
Columbia Rowing Club President**

Our two-stage displacement air chamber design creates a stable environment regardless of water height or conditions, giving you the confidence to focus on your rowing session.

Unlike other fixed docks that are set once installed, our coupling system is flexible and adaptable, easily reconfiguring as your needs change.

Chase a new personal best
or practice with your team any time.
